

JPS Showerscreens

How to measure your Showerscreen

Front Only

- 1) Mark your chosen height on both sides of the wall ie 1850 or 1950.
- 2) Take a measurement of the width (between walls) at the top of the shower and bottom (along the floor). Record the measurements on the horizontal lines provided at Diagram A.
- 3) Record your chosen height on the vertical lines provided.

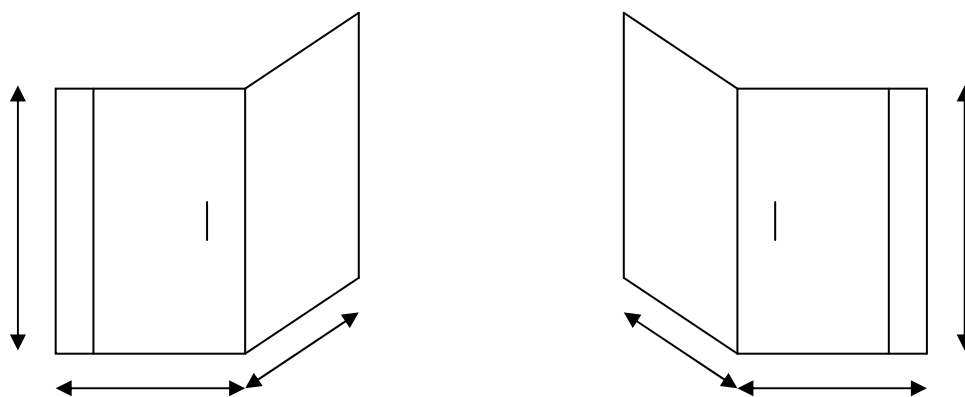

Diagram A

Standard and Non Standard Return Panel

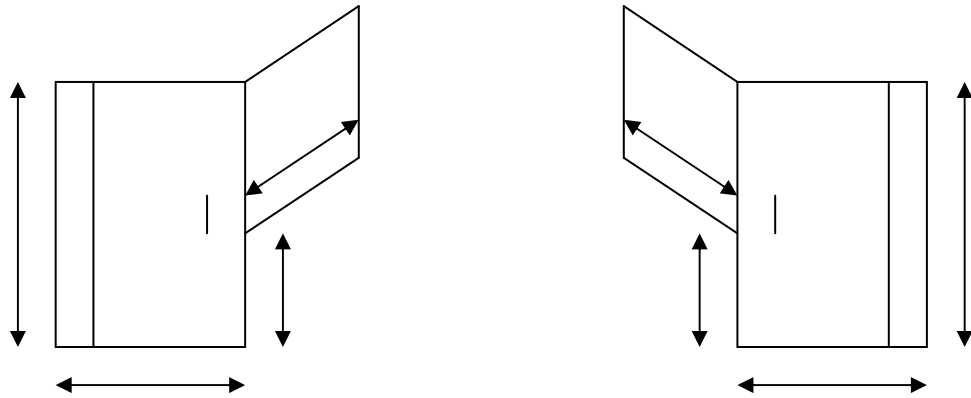

- 1) Measure out to where the return panel meets the Front section of the screen. Record measurements on the horizontal lines provided at Diagram B.

Diagram B

Non Standard 1/2 Return Panel

- 1) Refer to **Diagram C** below.

Things to Consider

- 1) When choosing your height keep in mind the finished tile height. Will the shower be taller than the top tile.
- 2) When choosing your door opening ie left hand or right hand, look where your vanity and towel rails are situated. The door on the Aquastyle 9000 only open outwards.
